

CDHB Fetal Surveillance Education Requirements

Fetal heart monitoring training is mandatory for all CDHB health professionals undertaking any aspect of electronic fetal monitoring (EFM), and is strongly recommended for all Lead Maternity Carers (LMC) (No charge).

From 2018, the CDHB staff requirements for Fetal Surveillance Education Programme (FSEP) are as follows:

Every year **either:**

- ▶ Half day RANZCOG FSEP Refresher
- or
- ▶ Online RANZCOG OFSEPlus (with token issued by CDHB for funded access)

Extra education is available anytime with the free version of OFSEP.

The full day RANZCOG FSEP programme is for new staff or those requiring a more in-depth update.
