CLASSIFICATION AND COMMUNICATION
FOR CAESAREAN SECTION AND
ASSISTED DELIVERIES IN THEATRE

PURPOSE
The purpose of this guideline is to describe the process of categorisation of caesarean section and assisted deliveries in the operating theatre and outline the principles of multidisciplinary communication in Birthing Suite which underpin the smooth, safe and rapid transition to the operating theatre when indicated in Christchurch Women’s Hospital.

BACKGROUND
Communication is often highlighted as an area for improvement in health care, including obstetric practice. Effective communication is central to enabling efficient decision making and ensuring clear processes in management and avoidance of unnecessary risk to the woman and her baby during emergency interventions, including Caesarean Section and assisted delivery.

The time taken for a woman to reach the operating theatre is a critical predictor of the decision to delivery interval. Such delay can be minimised by excellent communication both before and after decision making.

TEAM WORK
The caesarean section/assisted delivery team in theatre comprises many disciplines. The importance of forward planning and senior involvement cannot be over emphasised. In many cases factors that may contribute to an additional risk during labour are identified in the antenatal period. In such cases a clear and coherent management plan for labour should be clearly documented.

Once in Birthing Suite it is recommended that team work is enhanced by multi-disciplinary involvement at ward rounds. This, and ongoing regular dialogue between key disciplines, is required to identify those cases at high risk of intervention.

PARTNERSHIP
In the event of an emergency the purpose of the classification system is to confer an immediate and unequivocal signal to all team members with respect to the degree of urgency.

The decision for mode and urgency of delivery is the responsibility of the most senior obstetrician available. The decision for mode of anaesthetic is the responsibility of the anaesthetist and it is not
the intention of the classification system to influence this. It is possible that the most urgent category of delivery may be accomplished with a regional anaesthetic.

On making the decision regarding the need for urgent delivery in theatre and the categorisation, it is expected that the obstetrician will immediately liaise with the anaesthetist on call to summarise the clinical situation.

In many cases the anaesthetist will wish to assess the woman before transfer to theatre in order to formulate the most expedient plan for delivery.

A member of the Obstetric (or if unable, Midwifery) team familiar with the case should also prioritise an effective handover to the Neonatal Team that will be attending.

**MINIMISE DELAY**

Once a decision to deliver has been made, delivery should be carried out with urgency appropriate to the situation. This will take into account the safety of the woman and the wellbeing of her baby.

No ‘target’ time frame has been quoted for Category 1 and Category 2 deliveries.

Most delays between decision and delivery result from delays in transfer from the birthing suite room to the operating theatre. For Category 1 deliveries it is the responsibility of all members of the team to ensure rapid transfer to theatre once a plan has been made.

Delay can be minimised through clear identification of the roles and responsibilities of health care practitioners to ensure tasks are performed concurrently whilst preparing for the delivery in theatre. This process should be streamlined.

**PROCEDURE**

When there is a need for in theatre delivery, the obstetric registrar/obstetrician will determine the clinical urgency and advise the Associate Clinical Midwife Manager (ACMM) for birthing suite. The obstetrician will then inform the duty obstetric anaesthetist and provide a clinical summary.

The on call obstetric specialist is to be informed of all transfers to theatre – see [Registrar Supervision Guideline](GLM0019).

The Birthing Suite ACMM activates a Category 1 caesarean page which alerts the Category 1 delivery team (see Appendix B for constitution of team). For category 2 and 3 the Birthing Suite ACMM calls the theatre team and neonatal team (see Appendix A).

**CALL PROCESS**

The call process is outlined in Appendix A.
The urgency will be classified according to the following categories:

**Category 1:** Urgent delivery with immediate threat to life of woman or fetus.

**Category 2:** Maternal or fetal compromise requiring rapid delivery.

**Category 3:** Maternal or fetal compromise requiring early delivery.

**Category 4:** Delivery at a time to suit maternity services and the woman.

The category of urgency will be clearly indicated on the theatre suite wall.

### Category 1

For Category 1 deliveries the aim is to deliver with minimum delay. The team should liaise and mobilise as quickly as possible to facilitate delivery. All non-essential steps which might delay transfer of the woman to the obstetric theatre should be removed.

#### Example Indications for Category 1 - Immediate Threat to Life of Woman or Fetus

1. Fetal bradycardia with FHR < 100 bpm for > 5 minutes duration with no return to the baseline
2. Absent CTG variability (with no other explainable causes, e.g. Magnesium Sulphate infusion, beta blockers (Labetalol))
3. Fetal scalp lactate ≥ 5.8
4. Cord prolapse with bradycardia
5. Suspected scar dehiscence or uterine rupture
6. Any other indication as determined by the obstetrician

The categorisation and therefore urgency may be upgraded at any time to Category 1 should new concerns arise:

- If this occurs prior to the woman being transferred to theatre, the birthing suite ACMM activates the Category 1 page.
- If the upgrade occurs in theatre, the change in classification is communicated verbally to the team present by the obstetric team. The core midwife urgently alerts the ACMM via phone or pager regarding the developing situation. The ACMM activates the Category 1 page and requests the Ward Clerk call the Neonatal SMO to attend.
In the event of a Category 1 being downgraded to another category the obstetric team communicates the change in category to the neonatal team who will contact the on call Neonatal SMO to discuss whether they still need to attend.

**CATEGORY 2**

For Category 2 deliveries the aim is to deliver rapidly. The categorisation may be upgraded at any time should new concerns arise.

**EXAMPLE INDICATIONS FOR CATEGORY 2 - MATERNAL OR FETAL COMPROMISE REQUIRING RAPID BIRTH**

1. CTG abnormality with or without scalp lactate 4.8-5.7
2. Breech presentation in active labour unsuitable for vaginal birth
3. Any other indication as determined by the obstetrician

**Urgent second theatre activation** – if a Category 2 is called while another case is proceeding in the birthing suite theatre, the following steps are to be followed:

- The obstetric consultant determines whether the new case can wait for the current case to be finished (with the consultant expediting the first case if possible)
- If the new case cannot wait, the consultant (or their representative) calls the theatre coordinator and advises that they are calling a Cat 2, with “urgent second theatre activation”, and require a second theatre to be staffed
- From a main theatre perspective, the second theatre will be staffed as if it was a Cat 1 call.
- From an obstetric perspective, management will be as for an urgent Cat 2
- The consultant (or their representative) are responsible for ensuring the woman is rapidly prepared for and moved to theatre, minimising the time main theatre staff are away from their other work.

**Whilst awaiting delivery close surveillance of mother and baby must continue.**

**CATEGORY 3**

For Category 3 deliveries the aim is to deliver at the first convenient opportunity. The categorisation may be upgraded at any time should new concerns arise.

**EXAMPLE INDICATIONS FOR CATEGORY 3: MATERNAL OR FETAL COMPROMISE REQUIRING EARLY BIRTH**

1. Delay in progress of labour with no evidence of maternal/fetal compromise
2. Women booked for elective section who present in active labour, presuming indication for caesarean still exists and birth is not deemed to be imminent
3. Failed induction of labour presuming indication for induction still exists
4. Pre-eclampsia at term unsuitable for vaginal birth
5. Suspected IUGR unsuitable for vaginal birth with normal CTG
6. Any other indication as determined by the obstetrician
CATEGORY 4

For Category 4 caesarean sections the aim is to deliver at the convenience of the obstetric and neonatal service, the woman and her lead maternity carer (LMC). The categorisation may be upgraded at any time should new concerns arise.

EXAMPLE INDICATIONS FOR CATEGORY 4: NO MATERNAL OR FETAL COMPROMISE BIRTH AT A TIME TO SUIT THE WOMAN AND MATERNITY SERVICES

1. Planned elective caesarean section

NEONATAL TEAM

It is vital to ensure appropriate neonatal team presence at the time of birth.

The neonatal consultant will be automatically called to attend all Category 1 deliveries in theatre.

The neonatal consultant should also be called in advance of delivery whenever a general anaesthetic is required or where significant fetal compromise is anticipated (Appendix B).

In the event that a planned regional anaesthetic is converted to a general anaesthetic BEFORE DELIVERY OF THE BABY, this will be communicated by the obstetric team to the attending neonatal team, who will contact the on call Neonatal Consultant and request their attendance.

Category 1: the Neonatal Associate Clinical Nurse Manager (ACNM) and Clinical Nurse Specialist (CNS) (Advanced Neonatal Practice) or Neonatal Resident Medical Officer (RMO) will attend all Category 1 deliveries. The Neonatal Consultant will have been called by Birthing Suite Reception and will liaise with the Neonatal Team.

Category 2: the Neonatal Associate Clinical Nurse Manager (ACNM) and Clinical Nurse Specialist (CNS) (Advanced Neonatal Practice) or Neonatal Resident Medical Officer (RMO) will attend all Category 2 deliveries.

Category 3/Category 4: for all other deliveries the neonatal presence will be determined by the criteria set out in the accompanying neonatal team criteria for attendance document. (Refer to Appendix B).

THEATRE LOCATION

All operative deliveries will normally take place in Birthing Suite Theatre 26 or 27. In the event that both theatres are occupied then main theatres will be used.

If one obstetric theatre is already in use then the second on call anaesthetist and another theatre team may need to be mobilised.
TRIAGE IN THEATRE

Categorisation of urgency should be reviewed by the multidisciplinary team when the woman arrives in the operating theatre.

In the majority of cases it is useful to continue monitoring fetal wellbeing with cardiotocograph (CTG) in theatre whilst preparing for delivery. In some Category 1 situations, when the need for rapid caesarean section is inevitable, it may not be helpful to undertake further fetal monitoring. In these settings attempts at further monitoring may simply delay delivery.

The urgency of a particular situation may change between transfer from an assessment room or birthing room to the theatre suite. It may be necessary to adjust the plan for delivery.

CONSTITUTION OF TEAMS

The constitution of teams is outlined in Appendix B.

OBSTETRIC SURGICAL SAFETY CHECKLIST

The Obstetric Surgical Safety Checklist is used for all categories of delivery in theatre. A locally agreed checklist is mounted on the wall in theatre and requires visual and aural engagement by all in people theatre. Refer to Appendix C.

The SIGN IN is initiated by the anaesthetist or anaesthetic technician after arrival in theatre. In the case of a Category 1, SIGN IN is led by a theatre nurse during positioning of the woman.

TIME OUT is initiated by the obstetrician after positioning and before skin incision.

SIGN OUT is led by the theatre nurse at the end of the procedure before the woman leaves theatre.

ROLES AND RESPONSIBILITIES

With respect to communication, the roles and responsibilities of the various team members are outlined in Appendix E. It is expected that ISBAR principles are used throughout.

CATEGORIZATION AND PREPARATION OF CAESAREAN SECTION AND ASSISTED DELIVERY IN THEATRE PROCESS

For a summary of the classification and communication process refer to Appendix F.

APPENDIX A  CALL PROCESS

CATEGORY 1

ACMM pages (22) 5333 4# and activates Category 1 delivery team. Birthing Suite ward clerk phones neonatal consultant on call and asks if the neonatal consultant would like to speak to the Birthing Suite ACMM. The neonatal consultant will contact the NICU ACNM to inform them that they have received the message and are on their way.

The categorisation and therefore urgency may be upgraded at any time to Category 1 should new concerns arise:

- If this occurs prior to the woman being transferred to theatre, the birthing suite ACMM is informed, activates the category 1 page and requests the Ward Clerk phones the Neonatal SMO.
- If the upgrade occurs in theatre, the change in classification is communicated verbally to the team present by the obstetric team. The core midwife urgently alerts the ACMM via phone or pager regarding the developing situation. The ACMM activates the Category 1 page and requests the Ward Clerk call the Neonatal SMO to attend.

CATEGORY 2

ACMM calls theatre team and neonatal team. Obstetric specialist to liaise with anaesthetist.

Urgent second theatre activation
If a Category 2 is called while another case is proceeding in the birthing suite theatre, the following steps are to be followed:

- The obstetric consultant determines whether the new case can wait for the current case to be finished (with the consultant expediting the first case if possible)
- If the new case cannot wait, the consultant (or their representative) calls the theatre coordinator and advises that they are calling a Category 2, with “Urgent second theatre activation”, and require a second theatre to be staffed
- From a main theatre perspective, the second theatre will be staffed as if it was a Category 1 call.
- From an obstetric perspective, management will be as for an urgent Category 2.
- The consultant (or their representative) are responsible for ensuring the woman is rapidly prepared for and moved to theatre, minimising the time main theatre staff are away from their other work.

CATEGORY 3

ACMM calls theatre team and neonatal team. Obstetrician to liaise with anaesthetist.

CATEGORY 4

Book through elective system.

GENERAL ANAESTHETIC

NB: for any category of delivery where a general anaesthetic is administered a Neonatal Consultant must be notified at the time the decision is made for general anaesthetic
APPENDIX B  CONSTITUTION OF TEAMS (MINIMUM)

CATEGORY 1
Obstetric registrar and house surgeon, Anaesthetist or anaesthetic registrar, Anaesthetic Technician, Theatre Coordinator, Theatre team (Daily List Coordinator and Second Caesarean Nurse), PACU Nurse, Midwife, Neonatal Team (ACNM and RMO or CNS) and on call Neonatal Consultant.

CATEGORY 2
Obstetric registrar and house surgeon, Anaesthetist, Anaesthetic Technician, Theatre Coordinator, Theatre team (Daily List Coordinator and Second Caesarean Nurse), PACU Nurse, Midwife, Neonatal Team (ACNM and RMO or CNS).

CATEGORY 3
Obstetric registrar and house surgeon, Anaesthetist, Anaesthetic Technician, Theatre Coordinator, Theatre team (Daily List Coordinator and Second Caesarean Nurse), PACU Nurse, Midwife. Neonatal Team (ACNM and RMO or CNS) if indicated.

CATEGORY 4
Obstetric registrar and house surgeon, Anaesthetist, Anaesthetic Technician, Theatre Coordinator, Theatre team (Daily List Coordinator and Second Caesarean Nurse), Midwife. Neonatal Team (ACNM and RMO or CNS) if indicated.
## APPENDIX C  SURGICAL SAFETY CHECKLIST

### OBSTETRIC SIGN IN

1. Patient has confirmed:
   - Identity
   - Procedure and consent
2. Caesarean section category?
3. Appropriate NICU support called?
4. Allergies?
5. Difficult airway?
6. Group and screen or blood available?

*Category 2: SIGN led by nurse during patient positioning

### OBSTETRIC TIME OUT

1. Team members introduced by name and role.
   - Category 1 minimum: obstetrician, anaesthetist, nurse, core midwife, neonatal doctor / nurse
2. Team has reconfirmed:
   - Correct patient
   - Correct procedure
3. Antibiotics given.
4. Concerns or anticipated critical events?
   - Obstetrician
   - Anaesthetist
   - Nurse
   - Midwife
   - Neonatal doctor / nurse

### OBSTETRIC SIGN OUT

1. Instrument, swab and needle counts are correct.
2. Correct procedure/s recorded.
3. Specimens correctly labelled / sent?
4. Postoperative VTE prophylaxis?
5. Equipment issues?
6. Concerns for post-op management?
   - Surgeon
   - Anaesthetist
   - Other
APPENDIX D  NEONATAL TEAM CRITERIA FOR ATTENDANCE

NEONATAL TEAM ATTENDANCE AT BIRTH

Neonatal staffing for emergencies: (note times below when there are less staff available)

<table>
<thead>
<tr>
<th>Week days/Weekends/Public Holidays</th>
<th>Two Registered Medical Officer (RMO) or Clinical Nurse Specialist/Advanced Neonatal Practice (CNS/ANP) on duty with the Associate Clinical Nurse Manager (ACNM)</th>
<th>One may be called out on retrievals</th>
</tr>
</thead>
<tbody>
<tr>
<td>1630-0830am following day</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The Neonatal Consultant is called in advance of a delivery when a senior clinician is appropriate or there is a reasonable chance that advanced resuscitation is possible.

NEONATAL ATTENDANCE AT THEATRE DELIVERY

The tables below are not meant to be exclusive and it should be known that the ACNM may attend a birth instead of the RMO/CNS (ANP) if the RMO/CNS are busy on neonatal or already attending a birth.

Please note that there may be antenatal diagnoses that require a Neonatal Consultant presence regardless of Category. Those with the potential to cause cardiorespiratory compromise for example and as soon as a decision is made for a general anaesthetic.

APPENDIX E  ROLES AND RESPONSIBILITIES

MIDWIFE IN ATTENDANCE

- Care for woman and baby according to Multidisciplinary Caesarean Section Care Pathway
- Communicate with ACMM for Birthing Suite
- Communicate with Theatre team
- Document contemporaneously any resuscitation. Delegate this task if necessary

OBSTETRIC REGISTRAR/OBSTETRICIAN IN ATTENDANCE

- Inform ACMM for Birthing Suite
- Communicate with on call anaesthetist
- Inform consultant obstetrician
- Communicate with neonatal team or ensure that ACMM for Birthing Suite has done so
- Obtain informed consent for surgery and blood transfusion and document where practicable
- Supervise woman and ensure timely transfer to theatre
- Arrange for a surgical assistant
- Initiates TIME OUT as per the Obstetric surgical safety checklist.

ASSOCIATE CLINICAL MIDWIFE MANAGER (ACMM) BIRTHING SUITE

- Communicate with theatre team, PACU nurse and neonatal team
- For Category 1 the procedure is to page (22) 5333 4# and put a call out for a “Category 1 Caesarean Section”
- Instruct the Birthing Suite ward clerk to phone the neonatal consultant and connect call if required
- Instruct the birthing suite ward clerk to notify them that contact has been made with the neonatal consultant
- Alerts the teams if the woman’s clinical condition is stable and delivery may be delayed in the event other more urgent emergencies supervene
- Ensure appropriate staffing and safety of other women in Birthing Suite
- Ensure that the category status has been clearly marked on the whiteboard and in theatre

ACNM OR NEONATAL RMO

- Confirm category status with obstetric RMO/SMO
- Assess situation and obtain history on arrival in theatre
- Inform neonatal consultant if appropriate
- Inform neonatal consultant and request attendance if the category of CS is upgraded to Category 1 after initial decision
- Inform neonatal consultant and request attendance if there is a change from regional anaesthetic to general anaesthetic before delivery of the baby
ANAESTHETIST

- Communicate with obstetrician
- Communicate with ACMM for Birthing Suite
- Assess clinical situation and patient history to plan safe anaesthesia
- Inform consultant anaesthetist on call if appropriate
- Supervise woman and ensure timely transfer to theatre
- If anaesthesia changes from regional to a general anaesthetic ensure that this has been clearly communicated to NICU team as they will need to request neonatal consultant presence
- Anaesthetist or anaesthetic technician performs SIGN IN as per the Obstetric surgical safety checklist except if it is a Category 1.

DAILY LIST COORDINATOR

- Display category of theatre delivery on theatre whiteboard at start of procedure
- Remove category from theatre whiteboard at finish
- Lead SIGN IN for Category 1.
(NOTE: Categorisation may be upgraded at any time according to clinical concerns)

**CATEGORY 1**
Immediate threat to life of woman or fetus

- ACMM pages (22) 5333 4 and activates C1 CS team
- Ward clerk phones Neonatal Consultant on-call and connect ACMM
- Neonatal Consultant Mandatory

**CATEGORY 2**
Maternal or fetal compromise with no immediate threat to life requiring rapid delivery

**CATEGORY 3**
Maternal or fetal compromise requiring early delivery

**CATEGORY 4**
Delivery at a time to suit both woman and maternity services

Assessment of situation by Obstetric RMO/SMO

Need for caesarean section identified

Is there immediate threat to the life of the woman or fetus

NO

YES

Birthing Suite ACMM pages members of Caesarean Section and Neonatal team (ACNM + RMO/CNS)
Consider calling neonatal consultant

Woman transferred to theatre

Obstetric Surgical Safety Checklist (Ref.6772) completed

Proceed with surgery

Elective Caesarean Section booking procedure
## APPENDIX G  SUMMARY OF CLASSIFICATION AND COMMUNICATION FOR URGENT DELIVERY IN THEATRE

<table>
<thead>
<tr>
