

*In healthcare, quality activity is a systematic evaluation of an aspect of service against measurable quality indicators which has resulted in some improvement. This may be related to clinical practice or a service process improvement. It may be done as either an individual or with a group of staff in your area. Some tools are available on CDHB Intranet through the Quality site. Some quality improvement activity examples are: Audit, Incident/Event review, Data Analysis, Surveys, Timing Studies [CCDM]*

**Name of Quality Improvement/Change in Practice Initiative (ensure document or initiative is attached)**

**Date Quality Improvement/Change in Practice Initiative implemented**

**Why did you initiate the quality improvement/Change in Practice Initiative project and how did you implement it? e.g. quality deficit, patient complaint, chart audit, literature review**
